

# Are we violating sacred codes and oaths?

Watch this short clip from a much longer inquisitive interview with Aussie Wellbeing.

Hi gang. Please watch this very short clip by clicking [here](#) or on the photo. This clip originates from this more lengthy YouTube video that you can watch [here](#). It is there for now. Jason Weeks, Ilana Rachel Daniel and I did this interview over a year ago. How many lives have been unnecessarily lost during this time?

Informed consent is impossible not only in the context of Covid injectables, but all vaccines, though the gene therapy jabs falsely labeled vaccines are starkly leagues worse. More to the point, no MD, RN or CVS pharmacist can carry out a vaccination without breaking the fundamental medical ethic of first do no harm. The traditional, cyclical outbreaks of temporary, acute infectious illnesses have been replaced with an epidemic of chronic autoimmune and neurological disorders, thanks to vaccination.

Only once in my now thirteen years of vaccine research have I been told of a phone call to a pediatrician's office to find out whether the practice would accept non-vaccinating families, and the response was, Oh, we don't vaccinate anyone. It would be unethical.

This is one of the emails I received the other day. I get hundreds daily, and I am hearing you all.

This particular note spoke loudly to me and this lovely person gave me permission to share her words.
